Dave Doddridge has over 50,000 hours of hands-on experience owning, operating and working in construction and building inspection companies. He has also completed extensive coursework, seminar and lecture attendance in his particular areas of expertise. Dave was literally born into the construction business, as evidenced in a painting by his mother of him as a toddler hammering a nail into a board while “helping” his father do carpentry work.

Unlike most architects and engineers, Dave has been specifically trained in; slip-trip-fall accidents, construction safety regulations, residential and commercial building codes, building inspections and construction defect issues. He is also knowledgeable about legal issues related to being an expert witness. His 30 plus years of practical, hands-on experience provide him with the unique ability to translate written words into three-dimensional, real world interpretations. His extensive construction experience combined with his training makes him invaluable as an expert witness. His continuing and specific education in building codes, construction site safety and building inspections is a testament to his commitment to his profession.

Professional Experience:

D. A. Doddridge and Associates, Inc. 1996-Present

Expert consulting and building inspection firm providing; expert witness testimony, on-site inspections, expert report writing, and research for personal injury cases relating to building code compliance, premises liability, worker/job site injuries and construction defects/disputes. Commercial building inspections, ADA compliance and building code compliance inspections. General contracting services for residential and commercial construction and remodeling projects.

Doddridge Construction, Inc. 1983-1996

Accountable for all construction phases, from initial counseling through estimating and contract negotiation to certificate of occupancy, including supervision of employees and sub-contractors and responsibility for code conformance, construction site safety, etc.
