

Deep Analysis, Defensible Opinions, Skilled Testimony

Experts in Complex Software and IT Systems

DisputeSoft provides expert analysis, opinions, and testimony to assist counsel in efficiently resolving disputes over: software project failure, software trade-secrets misappropriation, software copyright infringement, software intellectual property, and computer forensics

450

software and IT matters

21

years in business

300+

US and international clients

Core Service Areas

Software Project Failure

DisputeSoft reviews project documents, traces software functionality, conducts source code reviews, interviews fact witnesses, assesses software defects and complexity, and measures percent complete and project delay.

Trade Secrets & Copyright

DisputeSoft investigates misappropriation of software trade secrets, and literal and non-literal copyright infringement using techniques such as source code comparison, and the Abstraction-Filtration-Comparison (AFC) test.

Intellectual Property

DisputeSoft conducts remote and on-site code reviews, researches prior art, analyzes patent claims, specifications and claim charts, helps develop proposed claim constructions, and analyzes patents invalidity.

Computer Forensics

DisputeSoft preserves and analyzes digital devices and media to recover deleted materials and key evidence. DisputeSoft evaluates the forensic analysis of opposing experts.
